*Used in continuous, heavy-duty applications.  
Powering factory equipment and machinery.*

The INDUSTRIAL SERIES of Compact Air compressors is especially designed to be used as a power source for industrial machinery and other compressed air systems.

The oil-free mechanism guarantees a smooth and low-wear operation with no breakdowns and unnerving maintenance requirements. The industrial nature of its use makes it especially suitable for 24/7 use.

Powered by the patented Axxer Motion technology, a single reciprocating piston slides along two low-friction cylinders. It results in constant pressure and optimal performance.
